

## Trees and More

There has been quite a bit of talk about the trees missing from the course. While many have heard the explanation we wanted to reassure that some of those “bare” spots will have new plantings soon. This winter was particularly brutal on our trees—many which were overgrown and top heavy. Some landed on greens (14—twice! And 15); several trees along the fence on 14 were snapped off 12—15 feet above the ground. Others uprooted themselves—falling in Jack Creek creating fish habitat. Quite a bit of firewood was available. There are still several trees, throughout the course, that are dead, broken off or uprooted but now that the rain has let up we’re focused on the growing grass!

If some of you have seen the crazy mole guy on the course, digging up holes, setting traps, checking traps, you know how excited he is about knocking the critters down. He will talk to you about how they “go on the bite” and you have to wonder if he’s talking fishing or gophers. Never

was he more excited than when he landed a “double” early one Sunday morning. It’s pictured here. Be sure to congratulate him on his big “catch”.

As we enter the summer season we’ll be working on fairways and tee boxes. Aeration, sand and more will be on the schedule. Also, be sure to notice all our new flower beds around the clubhouse—courtesy of **Freeman Rock**, Michelle & Becky, as well as the crew from Freeman! Thanks so much for beautifying our parking area!
